

Request for Roof Estimate Review

SYNTHETIC EXAMPLE - NOT FOR SUBMISSION

Re Case SYN-LOW-SLOPE roof estimate review

Dear Claim Representative,

Please review the identified estimate differences and the outstanding evidence requests. The comparison is incomplete; no complete revision amount or payment request is stated.

I-001: Review repair of the documented six SQ area.

I-002: Retain the existing drain-flashing repair.

The memorandum links each issue to its source evidence and calculation and identifies unresolved coverage questions. These construction figures are not a calculation of the amount currently payable.

Please provide an itemized response, identify any additional evidence needed, and explain any different measurement, scope, pricing, or policy basis. We would welcome a focused reinspection where observations differ.

Thank you for reviewing the documentation.

Sincerely,

Synthetic estimator

Attachments: reconciliation memorandum, operator checklist, evidence appendix. A revised licensed Xactimate estimate should be attached after operator reconciliation.
