

Request for Roof Estimate Review

SYNTHETIC EXAMPLE - NOT FOR SUBMISSION

Re Case SYN-SHINGLE roof estimate review

Dear Claim Representative,

Please review the documented changes from \$9,350.00 to \$12,400.00 in direct construction costs before taxes and general overhead and profit, a net change of \$3,050.00.

I-001: Correct measured surface area and the documented unit price.

I-002: Reduce the flashing allowance to 80 LF.

I-003: Retain the existing debris allowance.

The comparison includes \$-200.00 in reductions as well as the documented increases.

The memorandum links each issue to its source evidence and calculation and identifies unresolved coverage questions. These construction figures are not a calculation of the amount currently payable.

Please provide an itemized response, identify any additional evidence needed, and explain any different measurement, scope, pricing, or policy basis. We would welcome a focused reinspection where observations differ.

Thank you for reviewing the documentation.

Sincerely,

Synthetic estimator

Attachments: reconciliation memorandum, operator checklist, evidence appendix. A revised licensed Xactimate estimate should be attached after operator reconciliation.
