

Xactimate Operator Checklist

SYNTHETIC EXAMPLE - NOT FOR SUBMISSION

Use the verified record to prepare a separately saved estimate in licensed Xactimate. This worksheet does not create an ESX file.

[] Confirm active estimate versions, full page counts, source values and the exact pricing location and month.

[] Reconcile Sketch faces, slopes, lengths and openings against the measurement record; keep plan and surface area distinct.

[] Inspect each selected item and its labor, material and equipment components in the licensed installation.

[] Check automatic waste, manual formulas, macros, starter and ridge for overlap.

[] Attach item notes identifying the location, observation, exhibit, quantity calculation and inclusion check.

[] I-001: Correct measured surface area and the documented unit price. Expected direct change: \$3,250.00. Existing lines: B1. Proposed lines: P1.

Side / line	Quantity / unit	Unit price	Line total
baseline / B1	20 SQ	\$400.00	\$8,000.00
proposed / P1	25 SQ	\$450.00	\$11,250.00

Evidence IDs: E-BASE, E-PROP, E-NOTES. Confirm the actual selector, activity and included operations in licensed Xactimate; none is fabricated by this worksheet.

[] I-002: Reduce the flashing allowance to 80 LF. Expected direct change: \$-200.00. Existing lines: B2. Proposed lines: P2.

Side / line	Quantity / unit	Unit price	Line total
baseline / B2	100 LF	\$10.00	\$1,000.00
proposed / P2	80 LF	\$10.00	\$800.00

Evidence IDs: E-BASE, E-PROP, E-NOTES. Confirm the actual selector, activity and included operations in licensed Xactimate; none is fabricated by this worksheet.

[] I-003: Retain the existing debris allowance. Expected direct change: \$0.00. Existing lines: B3. Proposed lines: P3.

Side / line	Quantity / unit	Unit price	Line total
baseline / B3	1 EA	\$350.00	\$350.00
proposed / P3	1 EA	\$350.00	\$350.00

Evidence IDs: E-BASE, E-PROP, E-NOTES. Confirm the actual selector, activity and included operations in licensed Xactimate; none is fabricated by this worksheet.

[] Document job-specific price overrides and review tax, general O&P and labor minimum bases without defaults.

[] Run the configured estimate inspection; resolve material findings or record a justified exception.

[] Retain a Variation report for checkpoint pricing and a separate carrier-versus-contractor scope crosswalk.

- [] Export a readable revised estimate and the native project where authorized; verify that attachments are visible.
- [] Compare exported direct costs and financial totals to this memo. Record every difference and the operator identity.
- [] Confirm any policy/payment treatment separately and obtain the actual sender's approval of the exact document version.
